

NELDEM

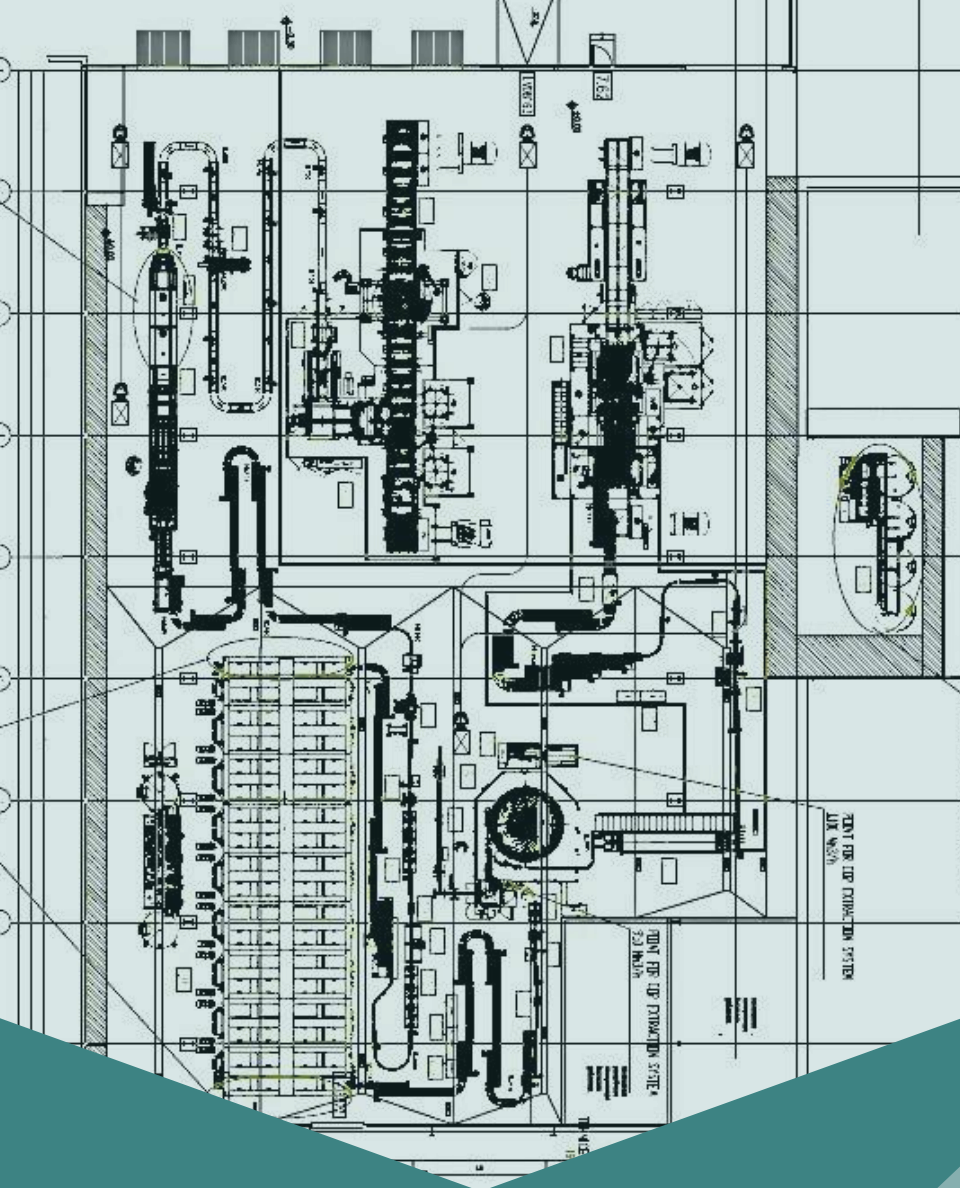

ITALIAN FILLING & PACKAGING PLANTS

WHO WE ARE

- Italian leading company in beverage filling industry
- Located in northern **Italy**, in the Lombardy region, an area known for the production of still and sparkling wines
- Founded in 2002, more than 20 years of expertise
- Over 180 projects completed in the beverage industry

OUR PHILOSOPHY

- **Design and construction** of equipment for filling liquid products into glass bottles, PET bottles and cans
- Engineering, consulting, implementation and installation of **turnkey projects** for complete filling and packaging lines
- **Marketing consulting** of industry-related products and machines
- **Upgrades and relocations** of existing machines and/or complete lines

OUR MISSION

- Commitment to our clients
 - Innovation and use of new technologies
 - **Excellence** in what we do
 - **Avant-garde** in custom-made
 - Providing **optimal** and **sustainable** solutions
 - Giving customers **the best product** for their needs
-
- **Reliability, solidity, efficiency , long service life** and **versatility** are the characteristics that make Nelden the ideal partner for building your bottling line.

OUR SYSTEMS

- We offer a wide range of **filling & packaging solutions** for liquid food products, both still and carbonated, in glass, PET, HDPE bottles and cans, from mignon up to big formats (gallons)

AUTOMATION

Every project is meant to ensure **high efficiency, quality, reduced manual intervention** and can guarantee a **safe and reliable production**.

OUR SYSTEMS FOR BOTTLING

- We provide reliable, customized solutions designed to operate on **24-hours duty cycles** with minimal maintenance required, offering the highest quality raw materials and components
- Double standards of quality are not allowed: the same quality offered on medium-high speed machines is also found on small speed machines

N
NELDEN

We offer a wide range of filling equipment for different products.

Capacity range: from 1.500 bph up to 50.000 bph

We display of different technologies for filling, depending on product to be treated.

OUR SYSTEMS FOR FILLING

Number of actuators and options (double pre-evacuation, double degassing etc.) depending on product to be treated.

- Functional drinks
- Energy drinks
- CSD
- Water
- Wine
- Beer
- Juices
- Ready to drink
- Milk and ESL
- Spirits
- Sauces
- Olive oil
- Vinegar
- Motor oil

Suitable for hot filling

COMPLETE MONOBLOCKS

GLASS

Complete rinsing, filling and capping monoblocks

Dosing of flat and carbonated products via mechanical or electropneumatic valves

1.500-50.000 bottles/hour

Possibility of "hot filling" at 85°C

COMPLETE MONOBLOCKS

PET

Complete rinsing, filling and capping monoblocks

Dosing of flat and carbonated products by mechanical, electropneumatic, or volumetric valves with electronic management

1.500-40.000 bottles/hour

Possibility of "hot filling" at 85°C

Standard type machines with neck-handling conveyor system

Possibility to set up the **Mixed Machine** to process both glass and PET formats

COMPLETE MONOBLOCKS

CANS

Complete rinsing, filling and seaming monoblocks

Carbonated products, beer, wine, juices and isotonic drinks
(hot filling and cold filling)

2.500-80.000 cans/hour

Possibility of "hot filling" at 85°C

Volumetric filling

TRANSPORT & LINE SYNCHRO

OUR SYSTEMS FOR BOTTLING

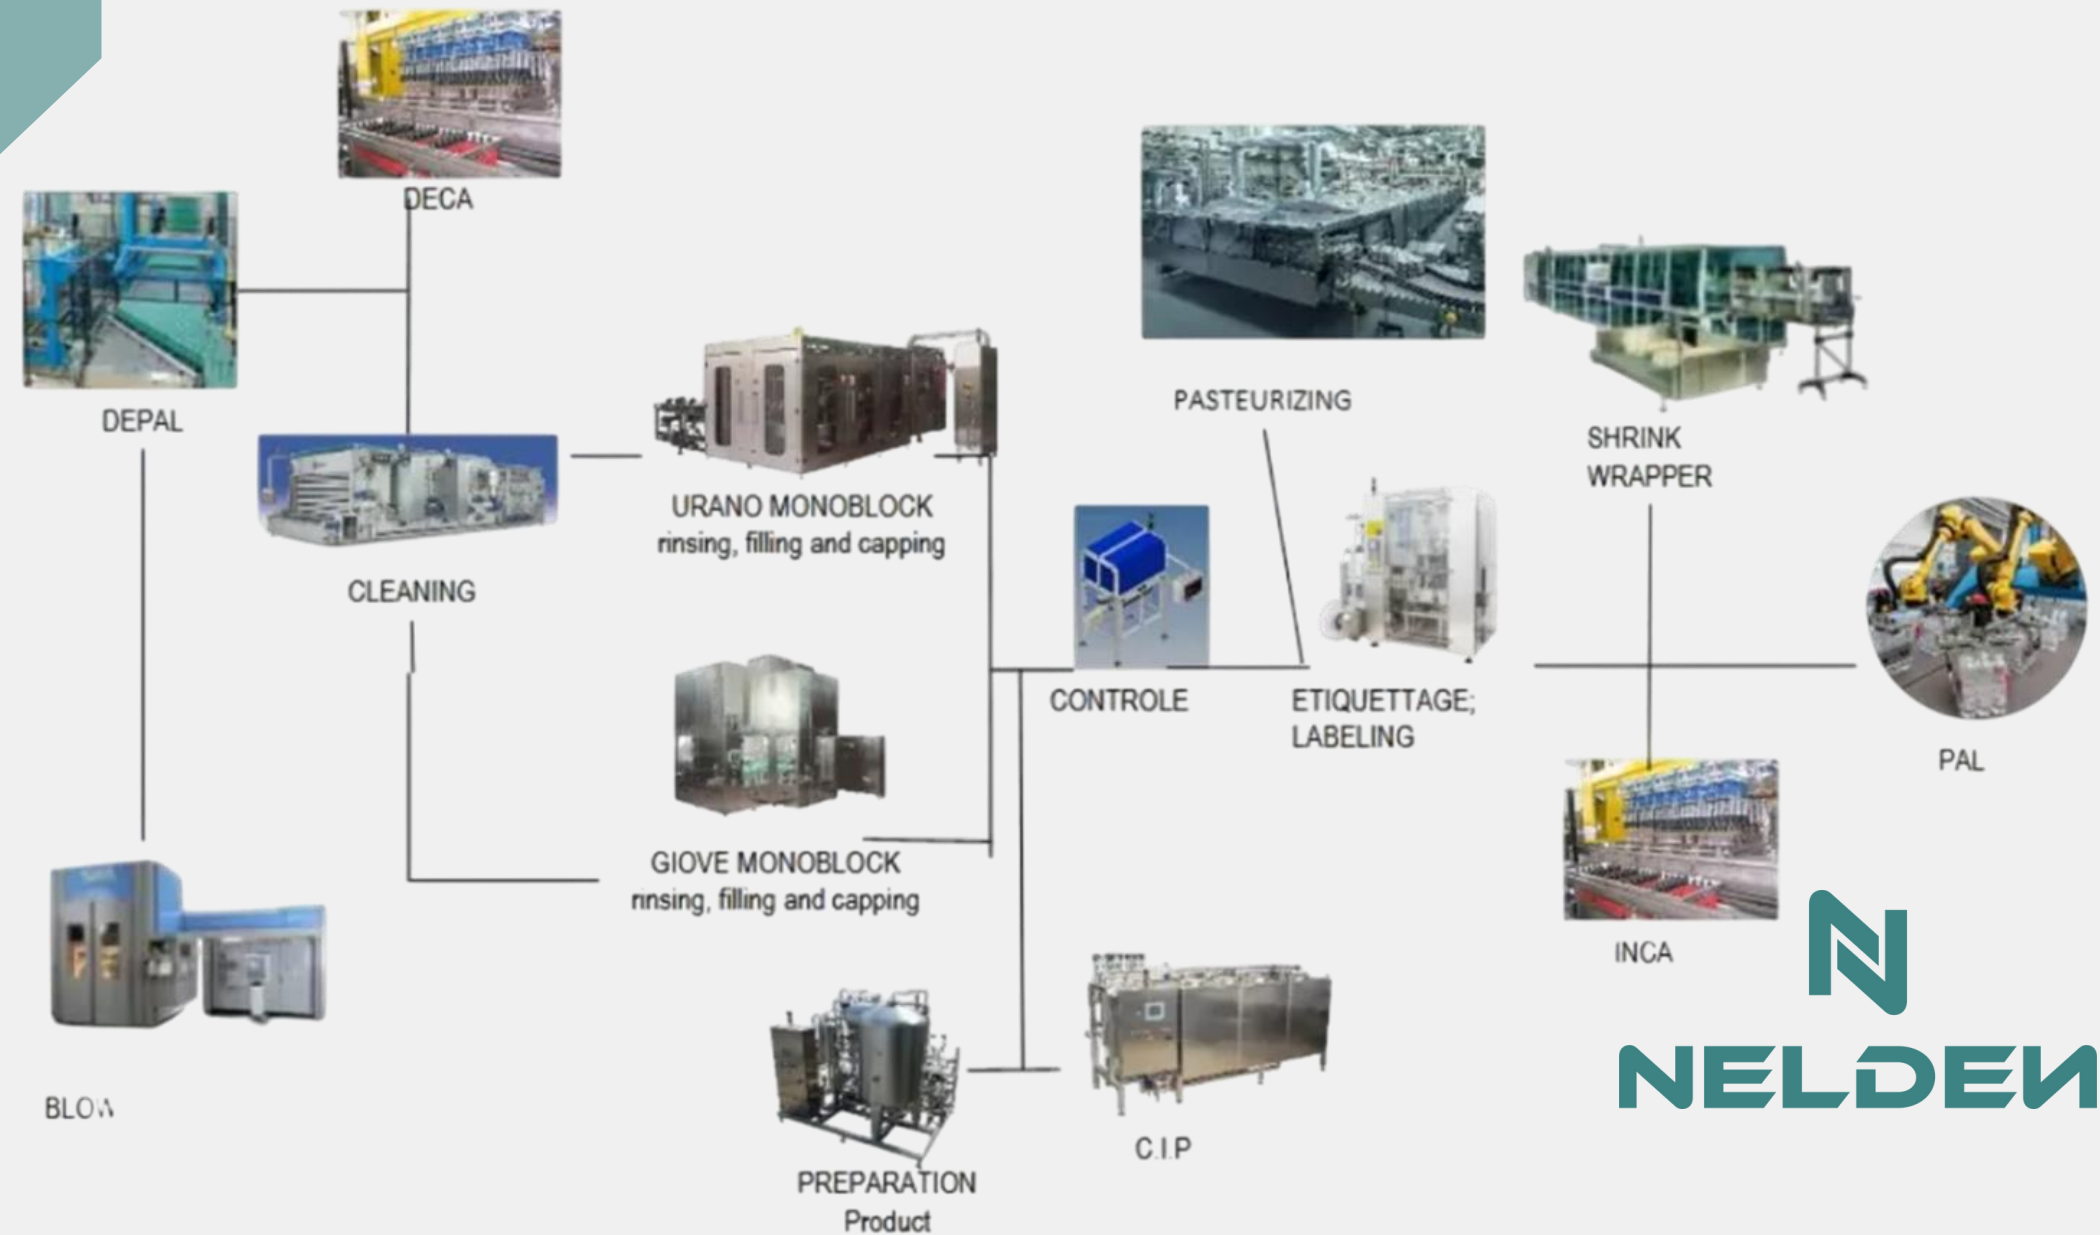

- We design and build tailor-made **conveyor** systems that perfectly match customer requirements, for perfectly integrated, efficient and reliable product flow.
- Bottle **drying tunnel** before labelling
- **Storage piles** for bottles, parcels and boxes
- **Dividers**
- **Elevators**

COMPLETE LINE

We design and supply complete bottling lines, starting from the project of the line tailored to customer needs, up to the end of the line, **ensuring seamless integration and high performance.**

OUR SYSTEMS FOR BOTTLING

SERVICES

OUR SYSTEMS FOR BOTTLING

Once the analysis of the customer's needs has been carried out and the technical details have been defined, our team of engineers develops a detailed project, ensuring **efficiency and reliability**.

We take care of the **installation** of the equipment with our own technicians. We also offer the possibility of taking charge of forklifts and cranes for unloading, pipings, power panel and related wiring etc., for a real **turnkey package**.

We offer a **continuous assistance service**, both in remote router connection and phone assistance (hotline), organizing on-site interventions, to ensure that the machines always operate at their maximum performance.

There is the possibility of including **transport** to the destination. We offer export services worldwide based on current incoterms regulations, guaranteeing the punctuality and safety of the goods until their destination.

MOBILE BOTTLING

OUR SYSTEMS FOR BOTTLING

- An innovative and versatile solution designed to handle glass, PET and can bottles
- The heart of the system is our special version of the filling machine, designed to fit perfectly for installation in small spaces on trucks or transportable container-type structures
